

### ABSTRACT OF THE DISCLOSURE

- A method for obtaining custom cut images products by an ordinary unskilled user/consumer wherein the consumer at a first location identifies a subject within a digital image for producing a cut image product. A software
- 5 program automatically differentiates the selected subject from the background. The consumer then places an order over a communication network to a production facility at a second location that is remote from the first location for producing a cut image product using the selected subject on a cut sheet of media.
